## Summary

I am a fourth-year Computer Science undergraduate, a Software developer, and an aspiring UI/UX designer & Fullstack developer. I strongly believe in teamwork, open-source projects, and community building. I have over 4 years of experience in Advanced level Computer Science coursework, such as algorithms and data structures; experienced with web technologies. I am dynamic, responsible, invested, and curious to discover new technology. I am also one of the best students in my faculty.

## Work Experience

### InterSwitch Group & QuickTeller Ambassador

2020 - Till Present

- Interswitch Limited (Interswitch or the Company) is an Africa-focused integrated digital payment, The Quickteller Platform owned by Interswitch is's the leading multi-channel digital commerce and payment platform in Nigeria.

As a Quickteller Student Ambassador, I was tasked with the responsibilities of onboarding new users to the Quickteller platforms, and continue to nurture these new users to ensure they transact on a regular basis for their everyday payments. I'm also an advocate of the brand in building positive sentiment within your network both physically and digitally.

- Google Developer's Group (GDG FUTA).
  - Member.
- Association of Computing Machinery(ACM).
  - Member.

## Certification

**JavaScript Certificate**

**Google Digital Skills**

## Education

Bachelor of Technology (B.Tech) in Computer Science

2016 - 2021

[Federal University Of Technology Akure.](#)

A Fourth-year student who has acquired more knowledge in:

- JavaScript.
- Frameworks (React JS, Gatsby JS, GraphQL).
- Web Technologies.
- Algorithm and Data structure.
- Digital Designs (UI/UX).
- Object-Oriented Programming.
- Digital forensics.
- Computer Troubleshooting.

## Debian Linux, Windows OS

Operating System

Windows and Linux-Ubuntu

Business & Leadership

Teamwork & Organization

Productivity & Passion At work

Dev post article writing

Medium, Dev Post, Twitter, Hash Node

## Objective

An Internship that allows me to practice and implement Computer Science theories and software development for knowledge, experience and to validate my B.Tech degree.

## INTERESTS

- Coding
- Innovation
- Optimal solution
- Music
- Games
- Football

- Linux & Windows Operating System.
- System Analysis & Designs.

## Projects

---

Intrio Basket march 2020 - present  
open source apps built with React.JS library (collaborative project)  
<https://intriobasket.ng>

CamShopify  
Comserve Geo Tagging App  
<https://camshopifycomserve.netlify.app/>

Tugapimage 2020 - present  
tugapimage.com is a Brand Photography WordPress website  
<https://tugapimage.com>

Exceptos Swag store is a basic e-commerce PWA, June 2019 - present  
<https://github.com/YemmyFolayan/exceptos-store>  
<https://store.exceptos.com>

Sound-mansion 2020 - present  
SoundMansion is modeled as a community-driven music streaming service where you can experience every kind of music which a commercial music streaming service like Spotify, Soundcloud, and others fails to deliver.  

- <https://github.com/YemmyFolayan/OrilsClosetEcommerce.git>

deployed on Netlify.  

- <https://github.com/YemmyFolayan/soundman.git> , **deployed on Netlify**
